Introduction

WPI

- This is just a short example
- The comments in the \LaTeX file are most important
- This is just the result after running pdflatex
- The style is based on the webpage <http://www.ru.nl/>

Slides with \LaTeX

Beamer offers a lot of functions to create nice slides using \LaTeX .

The basis

This style uses the following default styles:

- split
- whale
- rounded
- orchid

The important things

WPI

- 1 This just shows the effect of the style
- 2 It is not a Beamer tutorial
- 3 Read the Beamer manual for more help
- 4 Contact me only concerning the style file

Analysis of the work

WPI

This style file gives your slides some nice Radboud branding. When you know how to work with the Beamer package it is easy to use. Just add:

```
\usepackage{ru}
```

at the top of your file.

Conclusion

WPI

- Easy to use
- Good results
